Health Disparities and Intellectual Disabilities

The steady expansion of the European Union's involvement in health over the past 20 years has been accelerated by recent events. This handbook offers an up-to-date analytical overview of the most important topics in EU health law and policy. It outlines, as far as possible, the direction of travel for each topic and suggests research agenda(s) for the future.

International Journal of Research & Educational Perspectives

Autism Spectrum Disorder is one of the most researched and popular topics in the fields of psychology, psychiatry, and special education. In the last 30 years the amount of new information on assessment and treatment has been astounding. The field has moved from a point where many considered the condition untreatable to the current position that it may be

curable in some cases and that all persons with this condition can benefit from treatment. Intervening with school age children continues to be a major focus of assessment or intervention. However, expanding the ages of those receiving more attention from younger children to older adults, is becoming more prevalent. The consensus is that intensive treatment at the earliest recognized age is critical and that many adults evince symptoms of the disorder and warrant care. The field is full of many proposed treatments many of which offer promise but no data. Thus, a book on evidence-based assessments and interventions, across the life span should be of value in helping to sort out the more credible interventions as defined by the research and what methods have the best support. Given the popularity of the topic and the vast array of potential assessments and treatments available, this volume will be aimed at delineating what the researchers have shown has the best evidence to support particular methods. International Review of Research in Mental Retardation is now available online at ScienceDirect — full-text online of volumes 23 onwards. Elsevier book series on ScienceDirect gives multiple users throughout an institution simultaneous online access to an important compliment to primary research. Digital delivery ensures users reliable, 24-hour access to the latest peer-reviewed content. The Elsevier book series are compiled and written by the most highly regarded authors in their fields and are selected from across the globe using Elsevier's extensive researcher network. For more information about the Elsevier Book Series on ScienceDirect Program, please visit: <http://www.info.sciencedirect.com/bookseries/>

The Theory and Practice of Online Learning

The role of sport in development initiatives has grown dramatically over the last five years, now finding a place in the UN's millennium development goals. In Sport and Development for Peace, Simon Darnell outlines the most recent sociological research on the role of sport in development initiatives. The book analyses the relationship between sport and international development and looks at what this reveals about socio-political economy. It addresses a gap in the literature by focusing on issues of politics, power and culture, particularly looking at volunteer experience, mega-sporting events and sporting celebrity in the context of development. Darnell questions the belief that sport can offer a 'solution' to enduring development issues. Drawing on the latest empirical research, the book is a thorough and timely analysis of the social and political implications of tying sport to development.

Research Handbook on International Law and Natural Resources

State of the Art of Research on Down Syndrome, Volume 56, the latest release in the International Review of Research in Developmental Disabilities series, highlights new advances in the field, with this new volume presenting interesting chapters on the Genetics and Genomics of Down Syndrome, Motor Development and Down Syndrome, Cognitive Profiles in Individuals with Down syndrome, Working Memory and Down syndrome, Environment Learning in Individuals with Down

syndrome, Reading for Comprehension: The Contribution of Decoding, Linguistic and Cognitive Skills, Number Sense in Down syndrome, Early Starting States in Infants with Down Syndrome: Implications for Research and Practice, and more. Provides the authority and expertise of leading contributors from an international board of authors Presents the latest release in the International Review of Research in Developmental Disabilities series Updated release includes the latest information on the State of the Art of Research on Down Syndrome

Family-Focused Interventions

This special issue is among the first volumes to examine the topic of early development in children with neurogenetic disorders associated with intellectual disability. It includes discussions of theoretical issues regarding the emergence of behavioural profiles during early development, as well as comprehensive accounts of early development in specific disorders such as Down syndrome, fragile X syndrome, Williams syndrome, and sex chromosome disorders. In addition, several contributions examine the latest clinical applications of this work for diagnosis, treatment, and education. The main selling points of this volume are: the comprehensive nature of the reviews of early development in neurogenetic disorders provided by top researchers in the field of developmental disabilities research. innovation in the application of new approaches to this population, such dynamic systems theory and the developmental trajectory approach to studying these populations place this volume on the cutting edge of theoretical work in this area this volume also addresses the implications of emerging behavioural phenotypes in neurogenetic disorders from many angles—the biological issues related to diagnosis, psychiatric issues related to comorbid conditions such as autism and autism spectrum disorder, and educational issues related to targeted intervention

Management and International Review

International Review of Research in Developmental Disabilities is an ongoing scholarly look at research into the causes, effects, classification systems, and syndromes of developmental disabilities. Contributors come from wide-ranging perspectives, including genetics, psychology, education, and other health and behavioral sciences. Provides the most recent scholarly research in the study of developmental disabilities A vast range of perspectives is offered, and many topics are covered An excellent resource for academic researchers

In Cold Blood

International Review of Research in Developmental Disabilities is an ongoing scholarly look at research into the causes, effects, classification systems, syndromes, etc. of developmental disabilities. Contributors come from wide-ranging

perspectives, including genetics, psychology, education, and other health and behavioral sciences. Volume 42 of the series offers chapters on a variety of themes. Provides the most recent scholarly research in the study of developmental disabilities A vast range of perspectives is offered, and many topics are covered An excellent resource for academic researchers

Comparative and International Education

This third edition of the Handbook of International Research in Mathematics Education provides a comprehensive overview of the most recent theoretical and practical developments in the field of mathematics education. Authored by an array of internationally recognized scholars and edited by Lyn English and David Kirshner, this collection brings together overviews and advances in mathematics education research spanning established and emerging topics, diverse workplace and school environments, and globally representative research priorities. New perspectives are presented on a range of critical topics including embodied learning, the theory-practice divide, new developments in the early years, educating future mathematics education professors, problem solving in a 21st century curriculum, culture and mathematics learning, complex systems, critical analysis of design-based research, multimodal technologies, and e-textbooks. Comprised of 12 revised and 17 new chapters, this edition extends the Handbook's original themes for international research in mathematics education and remains in the process a definitive resource for the field.

International Review of Research in Mental Retardation

With contributions from a range of leading international authors, this 'stop and make you think' book explores the many contemporary issues surrounding emotion work in reproductive healthcare. The editors, forerunners in their field, have brought together both theoretical and clinical aspects to challenge readers to consider the significance of this important topic in their day-to-day work. Using examples of maternity care and infertility settings from the UK and beyond, and with an emphasis on personal reflection throughout, the book explores the subjects of: • Emotional well-being • Client-practitioner relationships • Infertility • Loss • Breast feeding • Motherhood Emotions in Midwifery and Reproduction underlines the importance of emotions and how they are managed, experienced and negotiated in clinical settings, addressing issues that are frequently overlooked in the drive for efficiency and effectiveness in the health service. It is stimulating reading for all midwifery and nursing students and practitioners looking to understand their patients' and their own emotional needs.

The Ebb and Flow of Global Governance

International Review of Research in Mental Retardation

International Journal of Urban and Regional Research

The Journal of Global Business and Management Research (GBMR) strives to comply with highest research standards and scientific/research/practice journals' qualities. Being international and inter-disciplinary in scope, GBMR seeks to provide a platform for debate among diverse academic and practitioner communities who address a broad area of business and management issues across the globe.

Early Development in Neurogenetic Disorders

This volume addresses three important areas of current research in mental retardation: behavioral toxicology research and its implications for the cause and prevention of some types of mental retardation, cognitive processes in mentally retarded individuals and the significance of this issue for the further development of remediation techniques, and social adaptation and family functioning and the importance of these topics for the study of mental retardation.

Using Secondary Datasets to Understand Persons with Developmental Disabilities and their Families

Narrative inquiry refers to a subset of qualitative research design in which stories are used to describe human action. This book contains current ideas in this emerging field of research. Chapters include a qualitative analysis of narrative data; criteria for evaluating narrative inquiry, linking emotion and reason through narrative voice, audience and the politics of narrative; trust in educational storytelling; narrative strategies for case reports; life history narratives and women's gender identity; and issues in life history and narrative inquiry. This text is intended to be of interest to all qualitative researchers and education researchers studying forms of narrative.

International Journal of Research and Scholarly Communication

International Review of Research in Developmental Disabilities is an ongoing scholarly look at research into the causes, effects, classification systems, and syndromes of developmental disabilities. Contributors come from wide-ranging perspectives, including genetics, psychology, education, and other health and behavioral sciences. The current volume, number 46, addresses current issues in the education of students with visual impairments. Topics covered include the

expanded core curriculum for students with visual impairment; assistive technology; Braille reading comprehension; communication development; orientation and mobility issues, and more. Provides the most recent scholarly research in the study of developmental disabilities A vast range of perspectives is offered, and many topics are covered An excellent resource for academic researchers

A Portrait of the Young in the New Multilingual Spain

Emotions in Midwifery and Reproduction

Research Handbook on International Law and Natural Resources provides a systematic and comprehensive analysis of the role of international law in regulating the exploration and exploitation of natural resources. It illuminates interactions and tensions between international environmental law, human rights law and international economic law. It also discusses the relevance of soft law, international dispute settlement, as well as of various unilateral, bilateral, regional and transnational initiatives in the governance of natural resources. While the Handbook is accessible to those approaching the subject for the first time, it identifies pressing areas for further investigation that will be of interest to advanced researchers.

The Viagra Ad Venture

Powerful account of the brutal slaying of a Kansas family by two young ex-convicts.

Life History and Narrative

International Review of Research in Mental Retardation is an ongoing scholarly look at research into the causes, effects, classification systems, syndromes, etc. of mental retardation. Contributors come from wide-ranging perspectives, including genetics, psychology, education, and other health and behavioral sciences. Volume 38 of the series offers chapters on autism intervention research, health, development and intellectual disabilities, perceptual-motor deficits in Down syndrome, and psychopathology in individuals with intellectual disabilities. *Provides the most recent scholarly research in the study of mental retardation *A vast range of perspectives is offered, and many topics are covered *An excellent resource for academic researchers

International Review of Research in Mental Retardation

The major changes in strategy and structure in MNEs increasing levels of global integration, innovation by design, new network structures, outsourcing of major value-chain activities, E-commerce and the backlash against globalization. This special issue includes an overview of the integration-responsiveness framework.

International Review of Research in Developmental Disabilities

Transactional Distance and Adaptive Learning takes a fresh look at one of the pioneering educational theories that accommodates the impact of information and communications technologies in learning. The theory of transactional distance (TTD) provides a distinct analytical and planning foundation for educators to conduct an overarching inquiry into transitioning from mass instructional and management systems in higher education to dynamic and transformational futures that focus on each individual learner. Based on the TTD, this pragmatic approach offers instructors, administrators, students, and other stakeholders a comprehensive planning method to assess the current state of their instructional, learning, and management practices and to develop alternative models to prescribe future improvements in their institution. This complex, self-organized, and adaptive method includes current and emergent properties of: hardware, software, and telecommunications systems that allow faculty, students, and administrators to communicate; instructional and curriculum systems that provide teaching and learning environments for faculty and students; and management, societal, and global systems that influence how institutions are supported, funded, and managed.

The SAGE Handbook of Research in International Education

International Review of Research in Mental Retardation is an ongoing scholarly look at research into the causes, effects, classification systems, syndromes, etc. of mental retardation. Contributors come from wide-ranging perspectives, including genetics, psychology, education, and other health and behavioral sciences. Volume 35 of the series offers chapters on theory and research, social cognition and social competence in children with Down Syndrome, the Flynn Effect and the role of IQ, remaining open to quantitative, qualitative and mixed-method designs, active support, child abuse, and the role of siblings of children with mental retardation. The wide range of topics covered in these chapters make Volume 35 of the International Review of Research in Mental Retardation a particularly valuable resource for academic researchers in developmental and cognitive psychology, as well as those in neuropsychology. Provides the most recent scholarly research in the study of mental retardation A vast range of perspectives is offered, and many topics are covered An excellent resource for academic researchers

Family Focused Interventions, Volume 59 in the International Review of Research in Developmental Disabilities series, highlights new advances in the field, with this new volume presenting interesting chapters that touch are Helping Parents of Children with Disabilities to Promote Risk-Taking in Play, Parent Mentoring Program or Telehealth Parent Support, Parent-mediated early intervention, Supporting fathers of children with disabilities, and more. Provides the authority and expertise of leading contributors from an international board of authors Presents the latest release in the International Review of Research in Developmental Disabilities series

Cohort Studies in Health Sciences

Neither an academic tome nor a prescriptive 'how to' guide, The Theory and Practice of Online Learning is an illuminating collection of essays by practitioners and scholars active in the complex field of distance education. Distance education has evolved significantly in its 150 years of existence. For most of this time, it was an individual pursuit defined by infrequent postal communication. But recently, three more developmental generations have emerged, supported by television and radio, teleconferencing, and computer conferencing. The early 21st century has produced a fifth generation, based on autonomous agents and intelligent, database-assisted learning, that has been referred to as Web 2.0. The second edition of "The Theory and Practice of Online Learning" features updates in each chapter, plus four new chapters on current distance education issues such as connectivism and social software innovations.

Global Business and Management Research

International Review of Research in Developmental Disabilities is an ongoing scholarly look at research into the causes, effects, classification systems, syndromes, etc. of developmental disabilities. Contributors come from wide-ranging perspectives, including genetics, psychology, education, and other health and behavioral sciences. Volume 41 of the series offers chapters on a variety of themes. Provides the most recent scholarly research in the study of developmental disabilities A vast range of perspectives is offered, and many topics are covered An excellent resource for academic researchers

International Review Research in Developmental Disabilities

The landscape of international education has changed significantly in the last ten years and our understanding of concepts such as 'international', 'global' and 'multicultural' are being re-evaluated. Fully updated and revised, and now including new contributions from research in South East Asia, the Middle East, China, Japan, Australasia, and North America, the new edition of this handbook analyses the origins, interpretations and contributions of international education and explores key

Read PDF International Review Of Research In Mental Retardation Volume 34 Handbook Of Assessment In Persons With Intellectual

contemporary developments, including: internationalism in the context of teaching and learning leadership, standards and quality in institutions and systems of education the promotion of internationalism in national systems This important collection of research is an essential resource for anyone involved in the practice and academic study of international education, including researchers and teachers in universities, governmental and private curriculum development agencies, examination authorities, administrators and teachers in schools.

Teaching for Wisdom, Intelligence, Creativity, and Success

This book examines the main issues in bilingual and multilingual language acquisition through children and youngsters growing up in today's multicultural Spain, where four official languages and other new languages are used. The studies cover phonetics, g

State of the Art of Research on Down Syndrome

International Review of Research in Developmental Disabilities is an ongoing scholarly look at research into the causes, effects, classification systems, syndromes, etc. of developmental disabilities. Contributors come from wide-ranging perspectives, including genetics, psychology, education, and other health and behavioral sciences. International Review of Research in Mental Retardation

'A sure-footed and self-confident book, ambitious in scope, authoritative in execution and practical in its implications' - Simon Maxwell, Director, Overseas Development Institute, London 'At last, a development studies text that encourages self-reflection from within the discipline. Highly recommended' - Professor Ray Kiely, Chair in International Politics, Queen Mary University of London 'This is the book that academics, development researchers and practitioners have been seeking for a long time. [It] addresses the most important issues which development researchers and practitioners cope with each and every day' - Dr Tran Tuan, Director, Research and Training Centre for Community Development, Hanoi, Vietnam. 'An insightful book for both development practitioners and researchers alike' - Professor K.N. Nair, Director Centre for Development Studies, Kerala, India This book is about working professionally in Development Studies as a student, researcher or practitioner. It introduces and addresses the fundamental questions that everyone engaged with development must ask: " What is 'development' and why do we wish to study it? " How do the many theoretical, methodological and epistemological approaches relate to research and practical studies in development? " How are

development research and practice linked? Accessibly written, with extensive use of case study material, this book is an essential primer for students of development studies who require a concise, penetrating overview of its foundations. It is also core reading for students and practitioners concerned with the design of studies in the course of policy analysis, sector reviews, or project formulation, management and evaluation.

Autism

International Review of Research in Mental Retardation is an ongoing scholarly look at research into the causes, effects, classification systems, syndromes, etc. of mental retardation. Contributors come from wide-ranging perspectives, including genetics, psychology, education, and other health and behavioral sciences.

International Review of Research in Developmental Disabilities

Since the FDA approved Viagra in March 1998, the «little blue pill» has been prescribed to over twenty million men. The *Viagra Ad Venture: Masculinity, Media, and the Performance of Sexual Health* chronicles the story of Viagra as reported in our nation's news outlets and promoted by Pfizer Pharmaceutical's marketing materials. In this critical discourse analysis, author Jay Baglia uses feminist and performance theory to uncover the meaning of Viagra and its relationship to performances of masculinity. At stake are the ways in which we construct normalcy, particularly as it relates to health, sexuality, gender, and the body. This book fits well in a variety of classes including gender studies, media studies, research methods, feminist theory, human sexuality, and health communication.

Handbook of International Research in Mathematics Education

International Review of Research in Developmental Disabilities, Volume 58, highlights new advances in the field, with this new volume presenting interesting chapters on topics including The Importance of Informal Supports in Meeting the Daily Needs of Adults with IDD, Forms and Functions of Special Education Advocacy: Supporting Families of Children with IDD, The Disability Training Needs of Healthcare Professionals, Health promotion and obesity risk in Intellectual and Developmental Disabilities, Community-based participatory approaches to IDD research, and Measuring behavioral problems in children with Down syndrome. Provides the authority and expertise of leading contributors from an international board of authors Presents the latest release in the International Review of Research in Developmental Disabilities series

International Review of Research in Mental Retardation

The International Journal of Research and Educational Perspectives is a peer-reviewed journal published in hard copy only. We publish original manuscripts of scholarly research relevant to issues related to international policies and global perspectives impacting student achievement in secondary and higher education.

Disciplining Terror

This revised and updated second edition of Comparative and International Education: An Introduction to Theory, Method and Practice provides a comprehensive and authoritative introduction to the key themes, definitions and approaches in this important field. It covers the history, theory, and methods of comparative and international education, as well as the relationship with education and national development, and outlines what we can learn from comparative studies. Clear explanations are complemented with examples of real research in the field including work on policy borrowing, learner-centred pedagogy and university internationalization.

An International Review of UK Research in Mathematics

The essential guide for teaching beyond the test! Students with strong higher-order thinking skills are more likely to become successful, lifelong learners. Based on extensive, collaborative research by leading authorities in the field, this book shows how to implement teaching and learning strategies that nurture intelligence, creativity, and wisdom. This practical teaching manual offers an overview of the WICS model—Wisdom, Intelligence, Creativity, Synthesized—which helps teachers foster students' capacities for effective learning and problem solving. Teachers will find examples for language arts, history, mathematics, and science in Grades K-12, as well as: Hands-on strategies for enhancing students' memory, analytical, creative, and practical skills Guidelines on teaching and assessing for successful intelligence Details on how to apply the model in the classroom Teacher reflection sections, suggested readings, and sample planning checklists Teaching for Wisdom, Intelligence, Creativity, and Success is ideal for educators seeking to broaden their teaching repertoire as they expand the skills and abilities of students at all levels.

Current Issues in the Education of Students with Visual Impairments

Since 9/11, we have been told that terrorists are pathological evildoers. Yet before the 1970s, hijackings, assassinations, and other acts now called 'terrorism' were considered the work of rational actors. Disciplining Terror explains how political violence became 'terrorism', and how this transformation ultimately led to the current 'war on terror'.

International Review of Research in Mental Retardation

Since its foundation in 1977 IJURR has been at the cutting-edge of critical urban scholarship. IJURR is taking forward its commitment to interdisciplinary and international urban research, connecting with new audiences and debates, consolidating its position as a leading publication in the field. Explores questions and themes of interest to a wide readership including urban planners, architects and practitioners. Includes both stand-alone articles and critical dialogues Connects with critical debates in the policy-making and professional arenas Uses visual materials ranging from architectural sketches, film stills and photographs to various explanatory figures and tables

Sport for Development and Peace

Discusses what autism is, how it is diagnosed, and how it is treated.

Research Handbook on EU Health Law and Policy

Challenges tradition to show how developments in international relations repeat themselves; we may soon experience a return to past trends.

International Development Studies

International Journal of Research and Scholarly Communication is a unique type of journal which publishes investigative research papers across all disciplines/areas. It also publishes global issues such as electoral challenges, health, education, politics, technology, ecosystem, wildlife among many others. It also publishes articles on humanities, social sciences, education, languages, law, political science, medicine, engineering etc.
