Religion, Religious Ethics and Nursing

Worship in spirit and in truth has to be based on God's Word that regulates us on how we must worship Him. The foundation of the regulative principle of worship is found in the first two commandments. Self-styled worship is unacceptable to God, regardless of the good intentions. Worship based on the traditions of men which were inspired by Satan are used as a sword and a shield against the truth. In doing this they successfully execute that very purpose which Satan intends them to; that

of a false and perverse worship shielded by obstinacy. A top priority in choosing a church to become a member should be based on no other criteria than that of a church that has its form of worship based on biblical principals.

The Nurse's Calling

Tea, Sticky Buns and the Body of Christ, POSTSCRIPTS FROM a NURSING HOME, is the story of one family, their beloved but stubborn father, and his last months in a nursing home. A "home" wasn't exactly what any of them had planned not that they ever had a plan. See how they coped - sort of - with all of the angst, incontinence and ongoing irony. Along the way, read about a nun with a bird on her shoulder, fights that erupted during bingo and daughters who laughed, cried

and crumbled as they became the raw meat of the “sandwich generation.”

There are few more loaded words in American life than "family." Jesus grew up in

one and honored his parents in fulfillment of the commandments. But his teachings on family life stand among the most jarring things he ever said. Jesus invites serious followers to "hate" mother and father. He predicts discipleship will bring division rather than peace to family life. He completely recasts the definition of kinship as "whoever does the will of God." In an era when families face unprecedented challenges sticking together for the long haul, Jesus's words at first glance seem to welcome disintegration of the Christian household rather than offering healing and a clear way forward. This book examines the off-putting words of Jesus in the wider context of radical allegiance and baptismal priority. In a country where family devotion is akin to honoring the national flag, Honeycutt unpacks an old word for a new generation of Christians called to place Jesus first in all things. It's only then that we'll be able to truly help those who share a common roof and lineage.

Religion: A Clinical Guide for Nurses

Nursing in My Veins Jesus in My Hearth

"[This] is a book that challenges you to step back and broaden your thinking about religion in general and religion in nursing. Nurses at all levels will appreciate the applications to nursing practice, theory, and research."--Journal of Christian Nursing "The Reverend Dr. Marsha Fowler and her colleagues have written a landmark book that will change and enlighten the discourse on religion and spirituality in nursing. The authors address the awkward silence on religion in nursing theory and education and with insightful scholarship move beyond the current level of knowledge and limited discourse on religion in nursing theory, education and practice. This book is path-breaking in that [it] gives many new ways to think about the relationships between ethics, health, caregiving, moral imagination, religion and spirituality." From the Foreword by Patricia Benner, PhD, RN, FAAN Professor Emerita of Nursing Department of Social and Behavioral Sciences and Nursing University of California, San Francisco The past 25 years have witnessed an escalating discussion on the role of spirituality within health care. This scholarly volume is rooted in the belief that not only is religion integral to nursing care, but the religious beliefs of both nurse and patient can significantly

influence care and its outcome. It offers an in-depth analysis of the ways in which religion influences the discipline of nursing, its practitioners, and treatment outcomes. Through the contributions of an international cadre of nurse scholars representing the world's major religious traditions, the book explores how theories, history and theologies shape the discipline, bioethical decision making, and the perspective of the nurse or patient who embraces a particular religion. It examines the commonalities between the values and thinking of nursing and religion and identifies basic domains in which additional research is necessary. The authors believe that ultimately, scholarly dialogue on the relationship between religion and nursing will foster and enhance nursing practice that is ethical and respectful of personal values. Key Features: Offers in-depth analysis of how religion influences the discipline of nursing, its practitioners, and treatment outcomes Uses critical theories to explore the intersections of religion, ethics, culture, health, gender, power, and health policy Includes an overview of all major world religions Focuses on the implications of religion for nursing practice rather than nursing interventions Designed for graduate and upper-level undergraduate students, nurse academicians and clinicians
